Technical support

Email site@duke.edu for information.

Additional information

[ImageCast Website](#)

ImageCast Advanced Edition contains all of the features found in ImageCast Standard and much more, taking the high-end network administrator beyond PC deployment to remote system management from one console.

With ImageCast Advanced, you receive remote system management with the System Agent and remote reboot capability with the PXE Server, eliminating the need for boot diskettes on PXE-enabled machines. Standardizing and managing site applications across the enterprise – for all groups and departments — has never been easier with AppNstall.

ImageCast Advance includes snapshot technology to handle your software installs, updates and registry changes. ImageCast Advance also offers the added functionality

of RestoreBuilder with ImageRestore, allowing you to create and restore an exact image of a hard drive setup, as well as the ability to generate restore CD-ROMs with RestoreBuilder.
