## Software Licensing

### SyncJe

#### Purchase information

Initial purchase: Download

Annual renewal: None

NOTE: Available to faculty, staff and students for use either on-site or off-site

#### Step 1: Request license

Fill out the [license request form](#).

#### Step 2: Download the client

Clients for multiple mobile devices and Windows (Vista/XP/2000) desktop agenda applications are available on the [NextHaus product page](#).

#### Step 3: Configure the client

The client can be configured to connect to the SyncML-compliant server of your choice.

#### Technical support

- ? Technical support for this software is not provided by OIT. Please visit <http://nexthaus.com/support.html>.
- ? Join the Higher Ed Nexthaus [community mailing list](#).

#### Additional information

- ? The SyncJe client allows you to synchronize your Address Book, Calendar and Tasks with any SyncML-compliant server over the Internet.
- ? Information on configuring a SyncML client such as SyncJe to connect to dCal can be found on the [dCal mobile device support page](#). For compatible mobile data devices, the recommended and supported dCal synchronization method is [NotifyLink](#).

## **Caveat for BlackBerry users**

Adding events to your BlackBerry calendar may cause your device to send emails to others who are invited to the same events. If you experience this problem, you have the option to remove a Service Book from your BlackBerry to prevent these calendar-triggered emails from being generated. For instructions, please [visit this page](#).

### **Requirements:**

- ? Hardware and software requirements vary by version
- ? Internet connection required for use
