

Duke Office of Information Technology

Computer Tuneup

These Web pages can help you get the most out of your Windows-run computer by insuring you're taking the necessary steps to keep it running well.

The site is organized into four simple sections, including virus and spyware removal, protecting your computer, organizing your files, and optimizing your operating system. Each section can be accessed individually, but we suggest going through all four steps for a thorough checkup.

1. [Remove viruses and spyware](#)
2. [Protect your computer](#)
3. [Organize programs and files](#)
4. [Optimize for performance](#)
