

# Duke Office of Information Technology

## Proxy Server

### IMPORTANT NOTICE

The proxy server is being turned off on Aug. 13, 2007, due to its lack of security.

We suggest that all proxy users download and install the Duke University VPN client or the Library's EZProxy. EZProxy provides access only to library resources. If you need to access anything other than library resources, please download and install the VPN.

Note: The Duke VPN client will not work over an ISP network connection via satellite.
